# 01 Context

02 JULY 22

Video of Jaish-e-Fursaan  
appeared on Twitter

13 JAN 23

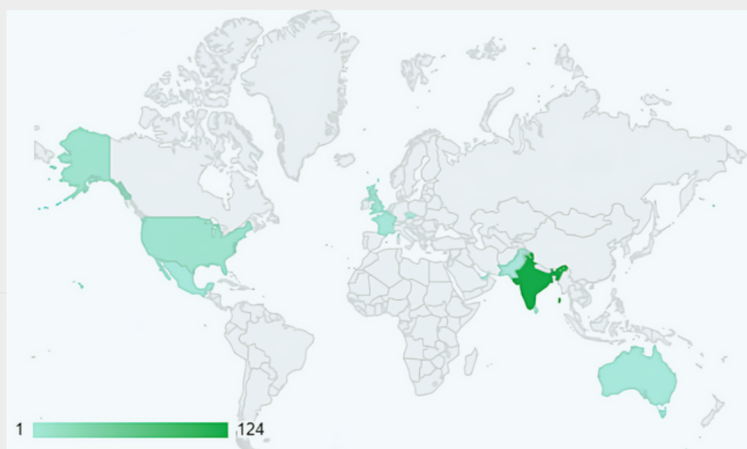

Several Indian Accounts  
Simultaneously Started  
Tweeting the video

**Name of a terrorist group Jaish-e-Fursaan-e-Muhammad appeared on Twitter on 02 July 2022 when some Indian twitter accounts started to propagate it's training video. However the chatter soon went silent.**

However, on 13 Jan 2023 the video reappeared in a coordinated manner from similar Indian accounts.

It was claimed by these Indian accounts that this video belongs to a North Waziristan based terrorist group which has threatened Pakistan Army and Pakistan's Inter-services Intelligence Agency. However, no on ground presence of such a group in the area has been verified by locals, local media or by the government.

# Conclusion

# 04

Analysis of Social Media footprint clearly dictates that a coordinated campaign to glorify terrorist group "Jaish-e-Furqaan-e-Muhammad" is conceived and proliferated by Indian Social Media Accounts. This tantamounts to cross border terrorism / abatement, thereof, which should not go unnoticed by international community. Subject terrorist group has no presence on ground, however propaganda is being proliferated to create panic and spread terror amongst local population. Such tactics by Indians are not new particularly in the backdrop of resurgence of TTP activities in Pakistan and exit of Pakistan from FATF grey list.
